

Meigret et le latin

Publication type: Article from a collective work

Collective work: [Actualités de Louis Meigret, humaniste et linguiste](#)

Author: Colombat (Bernard)

Abstract: This article shows how Meigret is able to construct a description of the French language from pre-existing descriptions of Latin, without being constrained by this model to which most of his contemporaries are subjected, very often unconsciously. Thus, while Meigret was inspired by a prestigious model, that of Priscien for Latin, he was particularly adept at adapting it to the data of a language, certainly descended from the former, but nevertheless very different.
