Abstract: Street names, social and cultural spots, all sketch out a Parisian geography. But more than space, it is a question of time. Paris, at the crossroads of the past, present, and future for career prospects, chance encounters, and social or political destinies. Other questions circulate at the heart of Parisian space-time: on the future of the theatre, and that of the city. Imbued with gravity or humor, nostalgia or fantasy, these temporal distortions lend Paris a kaleidoscopic aspect.
