

Le traducteur et la machine

Mieux travailler ensemble ?

Publication type: Journal article

Journal: [Des mots aux actes](#)

[2019, n° 8. Traduction et technologie, regards croisés sur de nouvelles pratiques](#)

Authors: Ehrensberger-Dow (Maureen), Massey (Gary)

Abstract: The use of language technologies has prompted an interest in their impact on cognitive processes and translation products. Drawing on a corpus of translation processes collected from professionals and students, the authors discuss translation as a cognitive and organizational activity and argue that translators need to take increased ownership of language technology tools at every stage: in their development, their application, and their integration into processes.
