Authors: Lefebvre-Chombart (Amélie), Robert (Pierre), Gardin (Laurent), Jany-Catrice (Florence), Mahieu (Christian)

Abstract: We analyze the prospects for the evolution of social and solidarity economy (SSE) organizations by the commons. The movement of commons develops new forms of collective action. A survey carried out in the Hauts-de-France region of France to study this movement has led to the identification of criteria for social commons relating to four dimensions of practice (governance, work, economic model, territory). These criteria represent a horizon for the evolution of SSE towards the common good.
