Journal: [Éthique, politique, religions](#)

[2023 - 1, n° 22. L'éthique de l'intelligence artificielle à travers les dispositifs et les pouvoirs](#)

Author: Davat (Ambre)

Abstract: The word "bias" is frequently used in the field of artificial intelligence without its potential causes and even its consequences being clearly defined. What are we talking about when we talk about bias in AI? Bias" actually refers to several norms that need to be made explicit in order to be debated politically. But far from exhausting the reproaches formulated against AI, the concept of "bias" can perfectly serve a technosolutionist discourse.
