

## Big Data et autodétermination informationnelle des individus

Publication type: Journal article

Journal: [Études digitales](#)  
[2016 - 2, n° 2. Le gouvernement des données](#)

Author: Vitalis (André)

Abstract: Digital technology now facilitates the expropriation of individuals' data by large private and public organizations. This phenomenon contributes to the violation of the principles of informational self-determination recognized by the law. It may undermine the functioning of democracy. Only consent-based Big Data projects could satisfy a minimum democratic requirement.
