

Transhumanist religiosity, The new frontiers of exploratory engineering

Publication type: Journal article

Journal: [Études digitales](#)
[2018 - 1, n° 5. Religiosité technologique](#)

Author: Pucheu (David)

Abstract: Of all the discourses that have accompanied the development of information technologies, transhumanism is one of the most extreme. A prophetic narrative with explicitly eschatological overtones, transhumanism seems to don the secular garb of a whole religiosity oriented towards the revelations of technoscience where man, as a true demiurge, would gradually be led to take control of his own evolution and of the world surrounding him.
