

Supply chain and circular economy

Three pillars to better understand practices

Publication type: Journal article

Journal: [European Review of Service Economics and Management](#) *Revue européenne d'économie et management des services*
2019 - 1, n° 7. varia

Authors: Dari (Laetitia), Paché (Gilles)

Abstract: The circular economy constitutes a deep change with the linear approaches which have long dominated research on the organization of industrial systems and supply chains. This viewpoint examines circular economy with reference to three axes: (1) waste management; (2) supply and economic actors; and (3) demand and consumer behavior. In order to better understand actors' practices, the suggested framework is applied to the cork supply chain in France.
