

Construction History

Between Technological and Cultural History

Publication type: Article from a collective work

Collective work: [L'Histoire de la construction / Construction History. Tome II. Relevé d'un chantier européen / Survey of a European Building Site](#)

Author: Picon (Antoine)

Abstract: Construction history is a thriving domain, its spectacular success provides a good opportunity to envisage the type of relation it has or should have with other domains of historical research. This paper examines in particular construction history vis-à-vis history of technology on the one hand, cultural history on the other. History of construction has passed the first moment of emergence or the phase of consolidation.
