

Histoire de la construction, un regard italien

Publication type: Article from a collective work

Collective work: [L'Histoire de la construction / Construction History. Tome II. Relevé d'un chantier européen / Survey of a European Building Site](#)

Author: Becchi (Antonio)

Abstract: This article presents a few aspects of Italian research dedicated to the history of construction. The history of construction asks new questions of all the disciplines of illustrious tradition, returning built architecture to the center of the debate in all its inextricable complexity. Historians of construction are asked to display profound epistemological originality: to think (or rethink) disciplines and knowledge.
