

## L'histoire de la construction et l'histoire des sciences

Publication type: Article from a collective work

Collective work: [L'Histoire de la construction / Construction History. Tome II. Relevé d'un chantier européen / Survey of a European Building Site](#)

Author: Sakarovitch (Joël)

Abstract: A specific branch of the history of techniques, the history of construction maintains complex relationships with the history of science; an analysis of these relationships allows us both to situate the history of construction and to open possible paths of research. While the history of construction is almost unknown in the history of science, some questions appear to be productive connections: statics, material resistance, the behavioral analysis of structures, and their modelling.

Pages: 1125 to 1137

Collection: [History of Technology](#)

CLIL theme: 3378 -- HISTOIRE -- Histoire générale et thématique
