

Looking for an Equilibrium Point

Wilson, Machiavelli and the King of Siam

Publication type: Article from a collective work

Collective work: [L'Histoire de la construction / Construction History. Tome II. Relevé d'un chantier européen / Survey of a European Building Site](#)

Author: Becchi (Antonio)

Abstract: What is *architectura*? What is construction? The architect described by Vitruvius in *De architectura* must know geometry, optics, gnomonic, etc. but, in order to transform ideas into buildings, he also must be able to guide and judge craftsmen, technicians and scientists, who know more than he does in their own fields of knowledge. he paper gives some glimpses of the disquisitions on *fabrica* and *ratiocinatio*, up to the analytical turn of mechanics.
