

## What is the History of Construction?

Publication type: Article from a collective work

Collective work: [L'Histoire de la construction / Construction History. Tome II. Relevé d'un chantier européen / Survey of a European Building Site](#)

Author: Summerson (John)

Abstract: This text is the editorial of the first issue of *Construction History*. The article suggests a two-part definition: the history of structural design and the history of constructive practices. The interest of the history of construction relates to the fact that it involves a large variety of people: those in the world of construction, which stretches from producers of materials to builders, including transporters, experts, insurance companies, and organizations for the protection of inventions.
