

La Littérature au gré du monde

Espace et réalité de Cervantes à Camus

Publication type: Book

Author: Fougère (Éric)

Abstract: Space has often been absent from the field of literary studies. The author examines the written space of little-known utopias of the late Enlightenment and early Romanticism, as well as of moralist works and novels, travel-tales and tales of life, portraits of behaviour and of nature, between the 17th and 20th centuries.
