

## La Non Trubada

La question des îles errantes dans les navigations d'autrefois

Grand prix littéraire de la mer 2014

Publication type: Book

Author: Girault-Fruet (Arlette)

Abstract: In the sixteenth and seventeenth centuries, the thesis of the wandering isle, which already held sway in classical antiquity, gains further grounds because of the infancy of new maritime knowledge, of deliberate state politics and cartographic choices, and of the failed quest for the Non Trubada – an island of pure language, without a real place.

Number of pages: 271
