

## Genèse et devenir des traces citationnelles dans la presse sous l'effet du temps

Publication type: Article from a collective work

Collective work: [Le Discours rapporté. Temporalité, histoire, mémoire et patrimoine discursif](#)

Author: Lacaze (Grégoire)

Abstract: This research is based on the analysis of newspaper articles from *Le Monde* and focuses on the circulation of quotations through time and memory while investigating how quotations link common knowledge and cultural history. Fragments of quotes identified in the press are usually linked to an historical event defined in space and time in the extralinguistic world. Hence a quote can be associated with a discursive event thanks to event names. This study also examines various types of modalisation affecting quotations.
