Authors: Mizouri (Imen), Sampaio (Angelo)

Abstract: Our aim is to describe the treatment of autochthonous borrowings in the dictionary. The starting hypothesis being to conceive the language as a system made up of dynamic sub-systems, in favor of a normative and fixist vision, we will first define this polylectal notion, after which we will focus on the borrowings of two linguistic systems: Arabic and Portuguese. We will examine their lexicographic treatment with examples taken from contemporary dictionaries.
