

« Minorité de tous les côtés »

La question du genre chez Nathalie Quintane

Publication type: Article from a collective work

Collective work: [Nathalie Quintane](#)

Author: Jacquesson (Chloé)

Abstract: Far-removed from univocal positions, Nathalie Quintane's œuvre interrogates representations of the feminine and the masculine with humour and plays with them to the point of undermining them. In the same way that she writes against poetic expectations, she is opposed to any feminine posture. In this way, Nathalie Quintane offers her own formulation of the question of gender, to which this article responds.
