

La parole vive dans le *Discours de la servitude volontaire* de La Boétie

Publication type: Article from a collective work

Collective work: [Nature et naturel. Autour du *Discours de la servitude volontaire*](#)

Author: Boulet (Michaël)

Abstract: Beginning with a comparison between the *Discours* and the mobile rhetoric of the *declamatio*, Michael Boulet undertakes an examination of variation in the enunciation and identification of addresses, in so far as this variation results from a voluntary system of expression. He can thus take into account the way in which La Boétie constructs irregularity, orality, and incompleteness in the *Discours*, which are also deliberate manifestations of the powerfulness of his speech.
