

## The exploitation of corpora for monitoring commercial designations

Publication type: Journal article

Journal: [Neologica](#)

[2019, n° 13. La néologie à l'ère de l'informatique et de la révolution numérique](#)

Author: Altmanova (Jana)

Abstract: The purpose of this contribution is to examine the essential issues related to the exploitation of corpora in the identification of proper names and, in particular, of commercial designations disseminated in everyday French. After a brief overview of the possibilities of semi-automatic detection of proper names in speech, we will focus our attention on the identification of trade names based on some indications of "lexicalization".
