

## La voie géologique vers l'être au monde

*Géologies* de Pierre Bergounioux

Publication type: Journal article

Journal: [Revue d'Histoire littéraire de la France](#)  
1 - 2019, 119e année - n° 1. varia

Author: Gado (Rania)

Abstract: In *Géologies*, Pierre Bergounioux aims to pursue his quest for identity by exploring the original soil. We seek here to highlight the geological model that underlies this self-exploration. The terrestrial components do more than just pave the way. Rocks, strata, faults and fossils are transformed under the pen of the writer into images that make it possible to probe the buried folds of his existence and to free his being-in-the-world.

Pages: 163 to 182
