

Jan Erik Vold's poetic spaces

Publication type: Journal article

Author: Veivo (Harri)

Abstract: Jan Eriks Vold' career stretches over five decades. While he has used several styles and approaches in his writing, the theme of space (of places, landscapes, cities) has always been present. The theme is interesting, since it allows us to analyse not only the philosophical gaze with which the norwegian author contemplates the world, but also the various poetic ideas that are present in his work, and also to situate Vold in relation to the literary tradition of his country.
