

The institutional work of destabilization of the 1,000-cows farm

Publication type: Journal article

Journal: [Systèmes alimentaires / Food Systems](#)
2022, n° 7. varia

Author: Condor (Roland)

Abstract: The paper analyzes the failure of the 1,000-cows farm using the concept of institutional work of destabilization. It shows how activists have destabilized this firm considered by its critics as the symbol of industrial agriculture. It proposes a typology of works and shows that it is necessary to understand the context of the case to take full measure of the institutional work carried out.
